

## WATER CONSERVATION

### What Can Go Down Our Storm Sewers?

Circle the items that CANNOT go down our drains

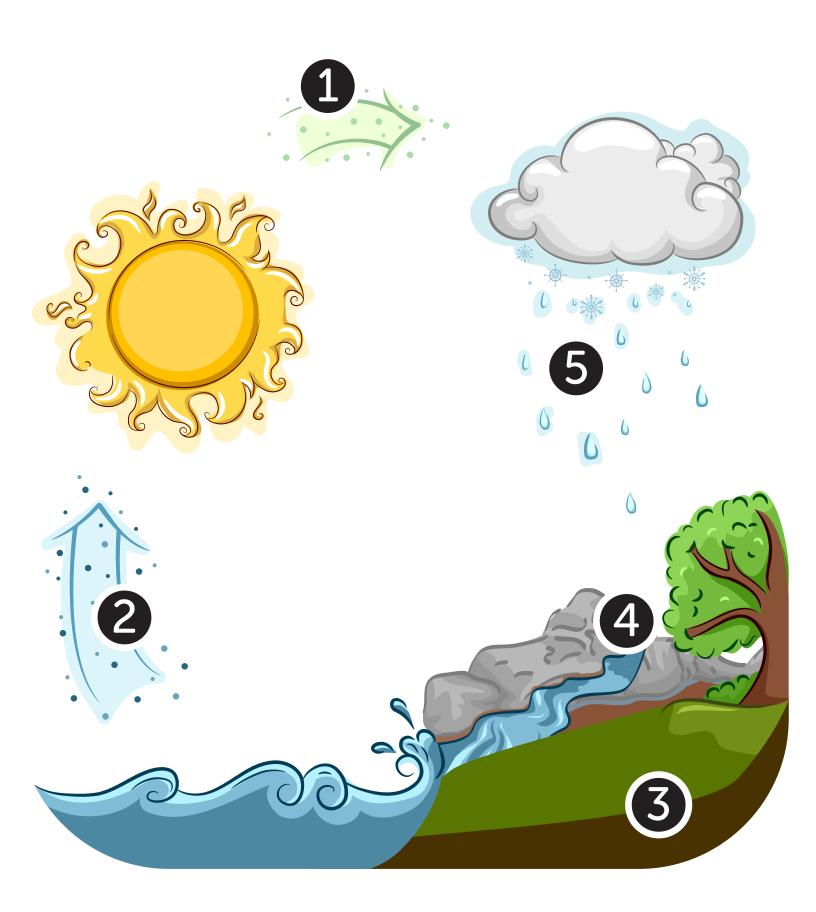

# Count the pieces of litter that caring crab needs to find to clean his home.

#### **The Water Cycle**

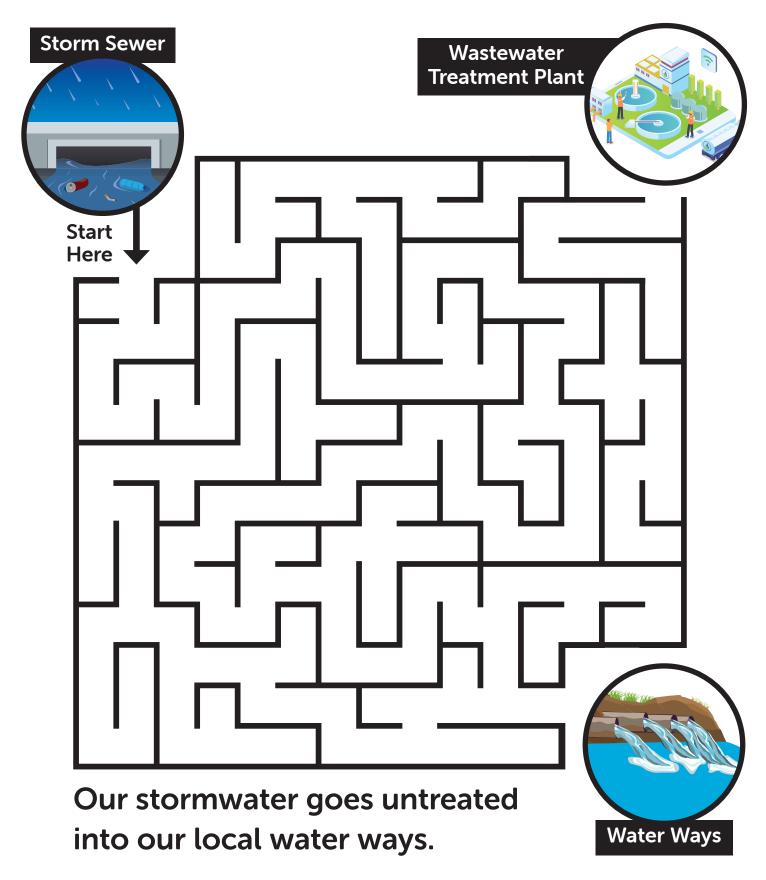

Match the number from the diagram with the action on the list.

V	Runoff Replenishes (recharges) vater in rivers, lakes, streams, and ponds.
F	Precipitation Falls to the earth
iı	n the form rain or snow.
	Condensation forms in
t	he atmosphere.
E	<b>Evaporation</b> forms when
V	vater from the surface,
þ	lants, or animals changes
iı	nto water vapour.
1	<b>nfiltration</b> is when water
S	eeps into the ground and
e	enters an aquifer.

#### **The Stormwater Mystery**

Do you know where our stormwater goes? Follow the pipes through the storm sewer to find out!

#### **Water Water**

#### Can you find the stormwater words?
