Re: Radio Frequency (RF) health concerns

- 1) All Sensus wireless devices are tested to comply to Industry Canada health and safety guidelines
- 2) The transmitter only transmits when requested. For the City of St Catharines, I understand regular billing is currently 3 times per year
- 3) The transmission lasts less than ½ second
- 4) The transmitter operates at a power level under 2 watts
- 5) The transmitter operates in the 900 MHz bandwidth (same as a garage door, cordless phone or baby monitor)

Sincerely,

Gareth Price, CET
