

To: Mayor Sendzik, Members of Council

Cc: Shelley Chemnitz, CAO
Department Heads

From: Tami Kitay, Director of Planning and Building Services

Date: February 24, 2020

Subject: GM Lands Update

The purpose of this memorandum is to give Council and update on the January 27, 2020 motion of Council, reproduced below:

WHEREAS residents living around the former GM lands have expressed serious concerns on the state of the GM lands, including property standards and unknown environmental hazards; and

WHEREAS the City of St. Catharines has taken steps to prosecute the current landowner over alleged infractions under the Building Code and Fire Code Act, but these court proceedings may take months to resolve and will not guarantee immediate action on issues on the site;

THEREFORE BE IT RESOLVED that the City of St. Catharines allocate \$125,000 from the Civic Project Fund to create a GM-lands specific budget to:

Motion Item	Actions Taken
<i>Immediately hire an external legal firm to advise Council and staff on the bylaws and provincial legislation, as well as legal precedents and case law, that would allow for cleanup and demolition of a privately-owned industrial site by the city and the mechanisms available of recouping costs from the current landowner through liens and other tools to ensure taxpayers are protected;</i>	External legal support has been retained. Work is on-going.

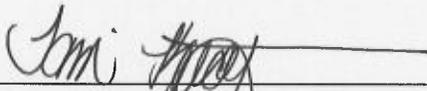

<p><i>Contact the Canadian Brownfield Network and ask for an expert to provide a presentation to Council and the public on best practices for brownfield management and remediation for municipalities;</i></p>	<p>Canadian Brownfield Network to present to Council on February 24, 2020.</p>
<p><i>Engage a security company on a month-to-month contract to keep people out of the site;</i></p>	<p>Arrangements have been made with Cantec for patrols to begin on February 26, 2020 between 5pm and 8am, 7 days a week. Initially, security has been retained for an interim period of 12 weeks at which time the service and budget will be re-evaluated.</p>
<p><i>Request an inspection and repair of the fencing on the site that was put up under a previous Emergency Order under the Building Code Act and in a manner that would allow the city to recover costs;</i></p>	<p>Internal legal counsel has prepared an application for a court order to obtain a lien for fencing costs. This work commenced prior to the January 24, 2020 meeting of Council.</p> <p>The property owner has begun efforts to secure the perimeter of the property, including installing new fencing and boarding windows the weeks of February 10 and 17, 2020.</p> <p>Municipal Works staff continue to undertake daily inspections of the perimeter fence.</p>
<p><i>Cover the cost of registration of two Councillors, staff, and a member of the City's Green Advisory Committee to attend the Canadian Brownfield Network conference in June 2020 in Toronto, and to report back to Council on current best practices, technology, financial tools, programs, and funding for brownfield redevelopment; and</i></p>	<p>To be finalized.</p>
<p><i>BE IT FURTHER RESOLVED that staff contact the Ministry of the Environment, three St. Catharines MPPs, local MPs, Niagara Region</i></p>	<p>Completed on January 29 and January 30, 2020.</p>

<p><i>Public Health and the NPCA for records and a report on how and when conditions on the site are monitored by their agency; and to request water testing, soil quality testing and air quality testing near residential neighbourhoods to be completed within the next month; and</i></p>	<p>The CAO and Senior Staff met with the NPCA on February 10, 2020.</p> <p>The Ministry of the Environment, Conservation, and Parks (MOECP) undertook surface water collection samples on February 13, 2020. Air particulate collection samples are unable to be taken until the Spring. The MOECP has been collaborating with Senior Staff on upwind and downwind monitoring locations from the public right-of-way.</p> <p>Asbestos falls under the jurisdiction of the Ministry of Labour and the MOECP has reached out to the MOL in this regard. The Ministry of Labour's mandate is initiated once workers are on site.</p>
<p><i>BE IT FURTHER RESOLVED that staff utilize the waste by-law as applicable in the interim; and</i></p>	<p>Legal, PBS, and MW staff are collaborating on logistics in this regard. Investigative work is on-going.</p>
<p><i>BE IT FURTHER RESOLVED that staff be directed to contact the Ministry of the Environment to request that costs be covered for an immediate air quality test, and if the Ministry of the Environment refuses to cover costs, this come back to Council to move forward; and</i></p>	<p>To date, this action has not been necessary.</p> <p>The NPCA's Water Quality Monitoring Program currently monitors 12 Mile Creek at stations upstream from the site (at Decew) and downstream (Martindale pond) and has done so since 2001. Testing for items beyond their standard protocols may necessitate cost recovery contributions from the City. As such, we are working with the MOECP to prevent duplication of efforts. See attached letter.</p> <p>Results of the NPCA's Water Quality Monitoring Program since 2005 are available on their website at this location: https://npca.ca/conservation#conservation-reportcards</p>
<p><i>BE IT FURTHER RESOLVED that there be the formation of a political action committee composed of the Mayor, ward Councillors, City staff</i></p>	<p>To be finalized.</p>

<p><i>and residents to develop a strategy to deal with the site and furthermore, to begin meetings with the Minister of the Environment to encourage the Minister to direct his staff to take direct remedial action; and</i></p>	
<p><i>BE IT FURTHER RESOLVED that the City register an official complaint to the Ministry of the Environment on behalf of residents and those listed on the petition presented.</i></p>	<p>Completed on January 30, 2020.</p>

CARRIED AS AMENDED

If you have any questions with regards to the above, please feel free to reach out to me at ext. 1713.

Tami Kitay, MPA MCIP RPP
 Director of Planning and Building Services
